

iDiv Seminar Series

Every Wednesday

12.30 – 2.00 pm, including coffee and snacks

- 02 Oct** Host: yDiv
Katherine Irvine (*James Hutton Institute*):
„Investigating people-environment relationships through inter- and transdisciplinary research”
- 09 Oct** Host: Molecular Interaction Ecology/ yDiv
Pablo Cardenas (*University of Copenhagen*):
„Combining Omics and QTLs to understand Evolution and Diversity of the Plant Metabolome”
- 16 Oct** Host: Experimental Interaction Ecology
Brajesh Singh (*Western Sydney University*):
„Microbial regulation of ecosystem functions: evidence from micro- to global scales”
- 23 Oct** sDiv working group sToration
Simon Stump (*Yale University*):
„Reexamining the impact that specialist natural enemies have on plant coexistence”

Loralee Larios (*University of California Riverside*):
„Understanding invasion and invader impacts to guide restoration”
- 30 Oct** Host: Spatial Interaction Ecology
James Clark (*Duke University*):
„Mast Inference and Forecasting (MASTIF) for climate change: the birth rates that control local to continental forest responses and their consequences for pulsed-resource food webs”

October 2019
