

24.04.2022

**Student assistant positions
(m/w/d) max 80h/Month for 3 months
(01.06.2022 – 31.08.2022)**

At the Martin Luther University Halle-Wittenberg, Natural Sciences Faculty I, Institute of Biology, in the group General Zoology starting on 01.06.2022 we have 3 month research assistant positions (HiWi max 80h/month).

The project: Cities are expanding worldwide and urbanization is considered a global threat to biodiversity. Our project aims to investigate how the environmental impacts of urbanization affect the evolution of wild bee populations living in cities. For this, we seek highly motivated student assistants (HiWis) to help with the sampling of bees in Halle.

Your tasks:

- Sampling bees using a hand-net
- Be capable of working alone in the field and also as part of a collaborative team

Your profile:

- Enrolled BSc or MSc student
- Willingness to work under potentially uncomfortable field conditions
- Team-oriented and strong organizational skills
- Motivation to contribute to an exciting project with an international team of scientists
- Entomology knowledge is a plus, but not a requirement
- Field work experience is a plus but not a requirement
